

Information Sheet: Application to Register Firearms for Businesses (Including Museums)

Ce formulaire est disponible en français.

Before You Start...

Use this form, if you are a business or museum, to:

- register firearms
- notify the Registrar of Firearms of a change to a registered firearm.

Fill out one form for each type of application: to apply for registration or to initiate a description change.

To register a firearm you must have a valid business firearms licence. To apply for a business firearms licence, complete and submit the form "Application for a Firearms Licence for Businesses (Including Museums)" (RCMP GRC 5486).

Other Ways to Provide Information:

- You can register firearms by accessing the [Business Web Services](#).
- You may attach a separate sheet of paper, such as a printout of your inventory, as long as it contains all firearm information requested in Section E - Firearm Information of this form. An approved verifier is required to complete Section D - Verifier Information of this form to show that the firearms on the list have been verified.

Do not use this form to transfer firearms. To transfer a restricted or prohibited firearm to another licensed business (including museums) or licensed individual, use form "Application to Register Restricted or Prohibited Firearms Acquired by Transfer" (RCMP GRC 5492).

A person may transfer a non-restricted firearm if at the time of the transfer:

- The buyer holds a licence that authorizes them to possess and acquire that class of firearm; and
- The seller of the firearm has no reason to believe that the buyer is not authorized to possess and acquire that class of firearm.

To confirm that the buyer holds a valid licence, the seller may contact the Canadian Firearms Program at 1-800-731-4000 or access the [Business Web Services](#).

If you need additional space, list all information requested on a separate sheet of paper, add your business' legal name and licence number to the top of each sheet and attach the sheet to your application.

If you need help completing this application form or require another form, call 1 800 731-4000. Additional information and some application forms are also available on [our Web site](#).

The following information explains certain parts of the form and will help you answer some of the questions. You should read the instructions as you fill in your form. If you are still unsure about a question, call 1 800 731-4000 for assistance.

Mail your completed application form and all attachments to:

Royal Canadian Mounted Police
P.O. Box 1200
Miramichi NB E1N 5Z3

A - Type of Application

Box 1

You **must** advise the Registrar, within 30 days, of any of the following modifications to a firearm that changes the description of the firearm:

- any modification that changes the class of the firearm.
- any modification to a frame/receiver that makes it capable of discharging ammunition.
- any modification to the type, action or calibre/gauge of the firearm.
- any modification to an altered automatic firearm.

B - Business/Museum Information

Box 4

The legal name that you print in Box 4 is the name that will appear on the Registration Certificate.

Box 5

Print your legal name (last, first and middle name), position title and contact information in case we need to get in touch with you to answer questions regarding the application. If you have a firearms licence print your firearms licence number in Box 5 d).

Information Sheet: Application to Register Firearms for Businesses (Including Museums)

D - Verifier Information

Businesses and museums are required to have all firearms in their inventory verified by an approved verifier before they may be registered. The Registrar of Firearms may request verification of a registered firearm after its description has been changed.

Verification is a way to confirm that the information you have provided about the firearm correctly identifies and classifies it. The verifier must be approved by the Registrar of Firearms. The approved verifier must provide the Firearms Reference Table (FRT) number. To obtain an FRT number or information on how to become an approved verifier, contact the Canadian Firearms Program at 1 800 731-4000.

E - Firearm Information

If you are reporting a change to the description of a registered firearm, you must provide the reference number, registration certificate number, and firearm identification number. Complete the boxes for the information that has changed.

a) Reference/Stock Number

This would be a number that you have internally assigned to an entry so that, if we need to contact you, we can identify the entry by this reference/stock number. This number may be a sequential number or it may refer to one of your internal inventory control numbers, whichever you prefer.

b) Registration Certificate Number

If you are reporting a change to the description of a registered firearm, you **must** provide the registration certificate number.

c) Firearm Identification Number

The firearm identification number (FIN) is a unique identifying number that is assigned to a firearm by the Registrar of Firearms. The FIN may be stamped or engraved on the firearm. A newly manufactured firearm will not have a FIN. If you are reporting a change to the description of a registered firearm, you must provide the FIN.

d) Frame/Receiver Only

If the firearm being reported is a frame or receiver only and cannot discharge ammunition, put a check mark in Box d), provide the serial number in Box e) and complete all boxes for which you have information.

i) Type

Use the abbreviation shown in the legend at the top of page 2 to indicate the type of firearm you are applying to register. For example, if you are registering a rifle, print RI in the box.

j) Action

Use the abbreviation shown in the legend at the top of page 2 to indicate the action of the firearm you are applying to register. For example, if you are registering a firearm with a bolt action, print BA in the box. Only print one code. If none of the codes is applicable, enter OT (Other) and specify the action in the space provided.

k) Gauge/Calibre

Gauge or calibre refers to the size of ammunition the firearm uses. It is usually stamped on the barrel of the firearm. If your firearm has more than one barrel with a different gauge or calibre, put both numbers separated by a slash.

l) Shots

For single-shot firearms, the number of shots is always "1". For multi-barreled firearms, the number of shots is the same as the number of barrels. For revolvers, "shots" refers to the number of chambers in the cylinder. For magazine-fed firearms, "shots" refers to the maximum number of cartridges that the magazine holds; it does not include the cartridge that fits in the chamber.

m) Barrel Length

For firearms other than revolvers, the barrel length is the distance from the muzzle of the barrel to and including the chamber, but does not include the length of any attachments. The barrel length of a revolver does not include the cylinder. Revolver barrel length is measured from the muzzle of the barrel to the breach end immediately in front of the cylinder.

Measure from the muzzle up to and including the chamber (for example, by measuring how much of the cleaning rod fits in the barrel when the action is closed). Put a check mark in the appropriate box to indicate the units of measurement (inches or millimetres).

Firearms Reference Table Number (FRT)

An approved verifier must provide Firearms Reference Table (FRT) number for each firearm registration and/or each description change to a registered firearm. A missing or incomplete FRT number will delay processing.

The FRT number may be inputted in the box after Box m) at the end of each firearm description. The verifier must ensure that when they record the FRT number that they include the Barrel, Calibre and Shot (BCS) identifier exactly as shown on the FRT (i.e. "parent" and "child" records).

Checklist

Before mailing your application, have you...

- answered all relevant questions?
- provided all required firearm information?
- had the firearms verified by an approved verifier?
- attached a separate sheet of paper with additional information (if necessary)?
- signed and dated the declaration?
